### Feedback Sought re: Development of Doonan<sup>®</sup> Wholesale Dealer Inventory Program

We appreciate your thoughts concerning development of and participation in a TruckPaper “Wholesale Dealer Inventory Program,” created exclusively for the Doonan<sup>®</sup> Dealer Network, with a **\$395 monthly Dealer list fee**. By joining, you would have the capability to list your **New Doonan<sup>®</sup> Trailer Stock** (along with the Wholesale asking price) for other participating Doonan<sup>®</sup> Dealers to see and contact you, should they have a customer with an immediate Doonan<sup>®</sup> trailer need?

## SPECIALTY PRODUCTS SHOWCASE:

### Doonan<sup>®</sup> Platinum<sup>™</sup> Flatbed

### World’s Leading Provider of On-Road Load Handling Equipment Turns to Doonan<sup>®</sup> to Engineer Platinum<sup>™</sup> Flatbed Trailer, Outfitted with a Forklift Application

The 47’ x 102” 90,000# GVR rated Doonan<sup>®</sup> Platinum<sup>™</sup> trailer was the ideal model for the customer’s application, providing outstanding performance, while incorporating robustness, versatility and safety for the end customer. This new addition to the customer’s fleet enables them to transport a forklift piggy-back, as well as large, heavy, unusually shaped loads.

The Doonan<sup>®</sup> Platinum<sup>™</sup> flatbed trailer combines the lightweight, bolt together deck of the Chaparral II<sup>™</sup> with the lightweight, welded steel main beams of the Doonan<sup>®</sup> Black Gold<sup>™</sup>.

The steel and aluminum combo, 22.5 tire, tandem axle trailer included a box tube rear sill for accommodating the forklift installation. The forklift is carried at the rear of the trailer, and is installed as high as possible to avoid contact with the ground.

The forklift mounting kit included welded support brackets for the front wheels of the forklift. The front tires of the forklift act as shock absorbers, ensuring that very little shock is felt by the machine in transit. The machine is held in place by two H/D pins, with two chains for safety. It can be mounted or dismantled from the trailer in a matter of just a few minutes.

Doonan<sup>®</sup> has installed forklift kits to haul many different brands of forklifts. Kits can be incorporated into the trailer design on Chaparral II<sup>™</sup>, Platinum<sup>™</sup>, Diamond<sup>™</sup> & Black Gold<sup>™</sup> models. Within each model, a wide variety of length and axle spread combinations can be achieved.

**Doonan<sup>®</sup> builds value and customer success into every trailer we make. Contact us today with your specialized trailer need!**

## Doonan.com ‘Content Marketing’ Continues to Evolve

Doonan<sup>®</sup> continues to update and add new Sales tools to its website. Watch in the coming week, for a new INFO page that will take the place of the current NEWS page.

Along with maintaining the current News Releases and monthly Profit Newsletter content, the new INFO page will include a tabbed directory of Training Videos and Technical Information. If you have additional content suggestions, please let us know.
